

# PROSIfos Cu L

## Copper Phosphite

**PROSIfos Cu L** is a phosphite copper in liquid form. Phosphorus provides the resistance to plant diseases and their effect is complemented with the curative and preventivenowned copper.

### **Applications**

PROSIfos Cu L is ready for implementation via soil and foliar applied to crops; citrus, fruit, tropical fruits, and vine, in vegetables such as potatoes, tomato, curcubitees and strawberry. Recommended doses vary depending on the application.

### **Mixing preparation and compatibility**

Before preparing a final mixture should make some compatibility tests. If in doubt consult with the Technical Department.

**PROSIfos Cu L** is compatible with most of NPK fertilizer and plant protection of normal use. Do not mix with very alkali products, mineral oil.

### **Observations**

The recommendations and information we have provided are the result of extensive and rigorous studies and trials. However, in using many factors may beyond our control (mixtures of preparation, implementation, climatology, etc.) The company guarantees the composition, design and content. The user will responsible for damage (lack of efficacy, toxicity generally waste, etc.) disrespect for all part of the label instructions.

Consult the technical service in case of doubt:
