

PROSifos K L

Potassium Phosphite

PROSifos K L is a PK fertilizer in liquid form. The Potassium provides to the plant an increment in the production of fruits and along with the Phosphorus, it increase her resistance to illnesses. The potash is essential in cultivations than need incrementing the sugar content.

Applications

PROSifos K L is ready for implementation via soil and foliar applied to crops; citrus, fruit, tropical fruits, and vine, in vegetables such as potatoes, tomato, curcubitees and strawberry. Recommended doses vary depending on the application.

Mixing preparation and compatibility

Before preparing a final mixture should make some compatibility tests. If in doubt consult with the Technical Department.

PROSifos K L is compatible with most of NPK fertilizer and plant protection of normal use. Do not mix with very alkali products, mineral oil, or dimethoate dicofol, and Dinocap.

Observations

The recommendations and information we have provided are the result of extensive and rigorous studies and trials. However, in using many factors may beyond our control (mixtures of preparation, implementation, climatology, etc.) The company guarantees the composition, design and content. The user will responsible for damage (lack of efficacy, toxicity generally waste, etc.) disrespect for all part of the label instructions.

Consult the technical service in case of doubt:
