

# PROSIfulvic L

## Fulvic Acid

A solution of fulvic substances for use in irrigation water or by foliar spraying. It increases the assimilation of mineral nutrients, it forms complexes with microelements, preventing problems of deficiencies. It stimulates root formation and increases crop productivity.

### Applications

We must always apply dissolved, especially incorporated in the irrigation water, directly to water flow, either through fertigation systems. It is ideal to apply the product through drip irrigation.

### Mixing preparation and compatibility

Before preparing a final mixture should make some compatibility tests. If you have doubt, consult with the Technical Department. **PROSIfulvic L** is compatible with most of NPK fertilizer and plant protection of normal use.

### Observations

The recommendations and information we have provided are the result of extensive and rigorous studies and trials. However, in using many factors may be beyond our control (mixtures of preparation, implementation, climatology, etc.) The company guarantees the composition, design and content. The user will be responsible for damage (lack of efficacy, toxicity, generally waste, etc.) Disrespect for all or part of the label instructions.

Consult the technical service in case of doubt:

### DECLARED CONTENT

Total humic extract	33% w/w	(41,58% w/v)
Fulvic acid	33% w/w	(41,58% w/v)
Density		1,26 gr/cc
pH		5.5

### CROPS SOIL L/ha APPLICATION

CROPS	SOIL L/ha	APPLICATION
Fruits trees	20-30	3 applications
Citrus fruits	25-30	4 applications
Horticultural plants	25-30	3 applications
Bananas	30-35	4 applications
Ornamental plants	15-20	4 applications
Olive trees	10-20	4 applications
Other crops	15-20	3 applications
